COSTA RICA
COLLABORATIVE BEHAVIOUR PROFILE (2020)

**Behaviour 1:** Enhance government leadership of sector planning processes

**STRENGTHS**
There is a national plan approved in 3 out of 7 WASH sub-sectors. There is active participation in national coordination for: Sanitation. A formal government-led coordination mechanism includes: working on basis of agreed national plan, all relevant ministries/agencies, donors that contribute to WASH activities nationally, non-governmental stakeholders.

**CHALLENGES**
This is no national plan approved in 4 out of 7 WASH sub-sectors. The national WASH plan requires more definition for: WASH coverage targets, specific measures to reach vulnerable groups. The is poor participation in national coordination for: Drinking Water, Hygiene.

**Behaviour 2:** Strengthen and use country systems

**STRENGTHS**
Public financial management includes: complete annual financial reports, procurement methods, public access to information. Public reporting enables: integration of personnel & payroll data, timeliness of changes to personnel/payroll data, internal controls of changes, payroll audits.

**CHALLENGES**
Public financial management is weak for: financial management information, public sector management, Supreme Audit institution independence. A number of the largest donors do not report on: use of country procurement systems (5), use of country financial management systems (5), support to strengthening sector systems/capacity (5).

**Behaviour 3:** Use one information and mutual accountability platform built around a multi-stakeholder, government-led cycle of planning, monitoring, and learning

**STRENGTHS**
A recent national assessment is available for: Drinking Water, Sanitation. National multi-stakeholder review mechanisms include: evidenced-based decision making. Routine monitoring and reporting includes: available routinely collected data, results accessible to all, data informed decision-making, an effective complaint mechanisms for WASH.

**CHALLENGES**
There has not been a national assessment within three years for: Hygiene. National multi-stakeholder review mechanisms are weak in: actions based on results. Routine monitoring and reporting does not strongly include: disaggregation for assessing inequalities.

**Behaviour 4:** Build sustainable water and sanitation sector financing strategies that incorporate financial data from taxes, tariffs, and transfers as well as estimates for non-tariff household expenditure

**STRENGTHS**
Government information is available for: budgets, expenditure reports, central government expenditure. Additional available information includes: external support expenditure, international public transfers, voluntary transfers. Revenue estimates are available for: Drinking Water.

**CHALLENGES**
Government information is incomplete for: state/provincial expenditure, local government expenditure. Revenue estimates are poorly available for: Sanitation. Household expenditure has limited availability for: Sanitation, Drinking Water. There is no finance plan fully addressing O&M in: Urban Sanitation, Rural Sanitation, Rural Drinking Water.
**GOVERNMENT**

1.1 A regularly reviewed, government-led national plan for WASH is in place and implemented

- ✓ Urban Sanitation
- ✓ Rural Sanitation
- ✗ Urban Drinking-water
- ✗ Rural Drinking-water
- ✗ Hygiene Promotion
- ✓ WASH in Schools
- ✓ WASH in Health Care Facilities
- ✗ WASH Coverage targets are present
- ✗ Specific measures to reach vulnerable groups exist

**GOVERNMENT**

1.2 A formal government-led multi-stakeholder national coordination mechanism exists for sector planning and review

- ✗ Coordination of activities of different organizations/sectors with responsibilities for WASH
- ND Works on basis of agreed national plan
- ✗ Documented and publicly accessible

**GOVERNMENT**

1.3 Activities captured in national WASH plans or aligned through mutual agreement

**GOVERNMENT**

1.3a.i Proportion of activities aligned

- ND MIVAH
- ND ARESEP
- ND Instituto Costarricense de Acueductos y Alcantarillados
- ND ESPH SA.
- ND Gobiernos locales

**GOVERNMENT**

1.3a.ii Proportion of activities aligned (5 largest donors)

- 50% Japan
- ND United Arab Emirates
- ND EU Institutions
- 50% Inter-American Development Bank
- ND Korea

**DEVELOPMENT PARTNERS**

1.3b ODA allocated to water and sanitation policy and administration and education and training

<table>
<thead>
<tr>
<th>Partners indicating their participation in national coordination</th>
</tr>
</thead>
<tbody>
<tr>
<td>No data</td>
</tr>
</tbody>
</table>

**DEVELOPMENT PARTNERS**

1.2b Support for government leadership of multi-stakeholder sector planning / WASH sector plan

- Partners supporting national level (3 = highly, 1 = limited)
  - No data
- Partners supporting decentralized level (3 = highly, 1 = limited)
  - No data

**DEVELOPMENT PARTNERS**

1.3a Activities captured in national WASH plans or aligned through mutual agreement

- ND MIVAH
- ND ARESEP
- ND Instituto Costarricense de Acueductos y Alcantarillados
- ND ESPH SA.
- ND Gobiernos locales

**DEVELOPMENT PARTNERS**

1.3b ODA allocated to water and sanitation policy and administration and education and training

- ND No data
- ✓ Yes
- ● Partially
- ✗ No

**Legend**

- ND No data
- ✓ Yes
- ● Partially
- ✗ No

- Alignment noted by government in GLAAS country survey 2018/2019
- Government reported data (GLAAS country survey 2018/2019)
- Development partner data (GLAAS ESA survey 2018/2019)
- Development partner data (OECD CRS-DAC)
- Data from World Bank data (OECD CRS-DAC)
- Data from Public Expenditure and Financial Accountability report (PEFA)
**GOVERNMENT**

### 2.1a

**Government defined public financial management and procurement systems adhere to good practices**

- ✓ Complete annual financial reports
- ✓ Procurement methods
- • Public access to procurement information
- ND Quality of budget and financial management information
- ND Quality of public sector management and quality of institutions
- × Supreme Audit Institution independence

### 2.1b

**Public sector budget and expenditure reporting enables the number and cost of civil servants working at central, regional and local levels to be estimated for different sectors**

- ✓ Degree of integration and reconciliation between personnel records and payroll data
- ✓ Timeliness of changes to personnel records and the payroll
- ✓ Internal controls of changes to personnel records and the payroll
- ✓ Existence of payroll audits to identify control weaknesses and/or ghost workers

**GOVERNMENT**

### 2.2a

**Development partners adhere to country planning processes and policies**

- Percentage of ODA spending using country procurement system(s) (5 largest donors)
  - ND Japan
  - ND United Arab Emirates
  - ND EU Institutions
  - ND Inter-American Development Bank
  - ND Korea
  - Other reporting development partners
    - ND National Bank of Costa Rica
    - ND Germany
    - ND Central American Bank for Economic Integration (CABEI)
    - ND Czech Republic

- Percentage of ODA using country public financial management systems (5 largest donors)
  - ND Japan
  - ND United Arab Emirates
  - ND EU Institutions
  - ND Inter-American Development Bank
  - ND Korea
  - Other reporting development partners
    - ND National Bank of Costa Rica
    - ND Germany
    - ND Central American Bank for Economic Integration (CABEI)
    - ND Czech Republic

**GOVERNMENT**

### 2.2b

**Amount of ODA allocated to strengthening country systems compared to WASH infrastructure projects**

- Proportion WASH ODA with participatory development and good governance (PDGG) as an objective
  - ND Principal objective
  - 0% Significant objective
  - 55% Not an objective
  - 45% Not specified

- Proportion of water and sanitation ODA to support strengthening sector systems / capacity (5 largest donors)
  - ND Japan
  - ND United Arab Emirates
  - ND EU Institutions
  - ND Inter-American Development Bank
  - ND Korea
  - Other reporting development partners
    - ND National Bank of Costa Rica
    - ND Germany
    - ND Central American Bank for Economic Integration (CABEI)
    - ND Czech Republic
**Behaviour 3:**
Use one information and mutual accountability platform built around a multi-stakeholder, government-led cycle of planning, monitoring, and learning

Less than 50% Urban sanitation 
Less than 50% Rural sanitation 
Over 75% Urban drinking water 
Less than 50% Rural drinking water |

Development partners committed to multi-year funding under a multi-year investment strategy*
- ✓ Inter-American Development Bank (ND), Spain (ND)
- × World Bank Group
- × No data

Data not available for other development partners.
ABOUT THE PROFILES

The Sanitation and Water for All (SWA) global partnership identified four Collaborative Behaviours that, if jointly adopted by governments and development partners, would improve long-term performance and sustainability in the water, sanitation and hygiene (WASH) sector.

BASED ON PUBLIC DATA

The country profiles provide an overview of how both the government and development partners are applying the Behaviours. Information regarding the government and development partners is presented to highlight areas of success and to encourage mutual accountability. The 2020 country profiles are the second round of profiles for the Collaborative Behaviours and they may be further refined moving forward.

USING THE PROFILES

These profiles are intended as a resource for countries and development partners to review publicly available data. While the profiles are not completely exhaustive, by bringing together relevant available data they may provide an overall summary of how governments and development partners are working in the sector according to the public record and are a starting point for discussions on how to improve behaviours to strengthen long-term sector performance.

Because of limitations in the availability of relevant data, often due to incomplete reporting in the WASH sector, many of the profiles contain considerable data gaps. These gaps are presented to catalyse discussions, and trigger action to ensure these are addressed in future monitoring rounds.

DATA SOURCES

The primary country data sources include the GLAAS 2018/2019 survey and the Public Expenditure and Financial Accountability report (PEFA) and Country Policy and Institutional Assessment (CPIA). The main data sources for development partners in the country profiles are the GLAAS 2018/2019 External Support Agency (ESA) survey and OECD CRS-DAC. Up to the five largest donors according to the OECD CRS-DAC (2017) are highlighted throughout this country profile. In addition up to four development partners who have submitted responses to the GLAAS 2018/2019 ESA survey and/or OECD CRS-DAC or who have been highlighted by a government response in the GLAAS country survey are included to highlight other development partners that have published data on their activities.

1 A plan sets out targets to achieve and provides details on implementation (based on policies where these exist). It indicates how the responsible entity will respond to organizational requirements, type of training and development that will be provided, and how the budget will be allocated, etc.
2 Aggregate from the cumulative score of the sub-indicators. The level of achievement is based on the total score divided by the total possible. Eighty percent or more (> = 80%) is five stars; from sixty (60%) to less than eighty percent (<80%) four stars; from forty (40%) to less than sixty percent (<60%) three stars; from twenty (20%) to less than forty percent (<40%) two stars and less than twenty percent (<20%) one star.
3 Coverage targets and those missing can be found in the GLAAS 2018/2019 country survey.
4 More specifics on the vulnerable groups can be found in the GLAAS 2018/2019 country survey.
5 Development partners include civil society, nongovernmental organizations, donors and others involved in aid development.
6 The largest development partners according to OECD CRS-DAC
7 The percentage and the total amount indicated are based on the expenditure in 2017; Source: OECD CRS-DAC, 2017.
8 Development partner data (GLAAS country survey 2018/2019)
9 Development partner data (OECD CRS-DAC)
10 World Bank data from Country Policy and Institutional Assessment (CPIA)
11 Data from Public Expenditure and Financial Accountability report (PEFA)
12 Dimensions 1-3 and 6 are PEFA (Public Expenditure and Financial Accountability) scores, based on an A to D scale (https://www.pefa.org/resources/catalog). Data from the most recent assessment available were used (2016).
13 Dimensions 4 and 5 are CPIA (Country Policy and Institutional Assessment) scores based on a 1.0 to 6.0 scale.
14 Quality of budgetary and financial management assesses the extent to which there is a comprehensive and credible budget linked to policy priorities, effective financial management systems, and timely and accurate accounting and fiscal reporting, including timely and audited public accounts. (1=low to 6=high) Source: http://databank.worldbank.org/data/reports.aspx?source=country-policy-and-institutional-assessment. 2018 data.
16 Dimensions 1-4 are PEFA (Public Expenditure and Financial Accountability) scores, based on an A to D scale (https://www.pefa.org/resources/catalog). Data from the most recent assessment available were used (2016).
17 Data for this indicator are not currently collected at the global level.
18 Inequalities are assessed for “poor populations” for water, sanitation and hygiene promotion. Source: GLAAS 2018/2019 country survey.
19 Data for this indicator are not country specific. Source: GLAAS 2018/2019 ESA survey. Based on the question if monitoring and evaluation is a priority for the ESA WASH strategy and/or activities in the WASH sector.
