MOROCCO
COLLABORATIVE BEHAVIOUR PROFILE (2020)

Behaviour 1: Enhance government leadership of sector planning processes

STRENGTHS
There is a national plan approved in 5 out of 7 WASH sub-sectors. The national WASH plan includes: specific measures to reach vulnerable groups. A formal government-led coordination mechanism includes: coordination of activities in different WASH sub-sectors, working on basis of agreed national plan, all relevant ministries/agencies, donors that contribute to WASH activities nationally, non-governmental stakeholders, documentation and accessible public information.

CHALLENGES
There is no national plan approved in 2 out of 7 WASH sub-sectors. The national WASH plan requires more definition for: WASH coverage targets. There is poor participation in national coordination for: Drinking Water, Sanitation, Hygiene. Data are missing on the alignment of activities of all national institutions in this report.

Behaviour 2: Strengthen and use country systems

STRENGTHS
Public financial management includes: complete annual financial reports, procurement methods, public access to information, Supreme Audit institution independence. Public reporting enables: integration of personnel & payroll data, timeliness of changes to personnel/payroll data, internal controls of changes, payroll audits.

CHALLENGES
Public financial management is weak for: financial management information, public sector management. A number of the largest donors do not report on: use of country procurement systems (5), use of country financial management systems (5), support to strengthening sector systems/capacity (5).

Behaviour 3: Use one information and mutual accountability platform built around a multi-stakeholder, government-led cycle of planning, monitoring, and learning

STRENGTHS
A recent national assessment is available for: Drinking Water, Sanitation. National multi-stakeholder review mechanisms include: actions based on results, evidenced-based decision making. Routine monitoring and reporting includes: available routinely collected data, results accessible to all, data informed decision-making, disaggregation for assessing inequalities, an effective complaint mechanisms for WASH.

CHALLENGES
There has not been a national assessment within three years for: Hygiene. Up to 25% of partners do not report monitoring results to government in: Sanitation, Drinking Water, Hygiene.

Behaviour 4: Build sustainable water and sanitation sector financing strategies that incorporate financial data from taxes, tariffs, and transfers as well as estimates for non-tariff household expenditure

STRENGTHS
There is a finance plan covering O&M to some degree in: Urban Sanitation, Urban Drinking Water, Rural Drinking Water. The government has reported on WASH assistance provided on treasury or on budget (3 out of 5 parameters). Other development partners have also reported (1 presented in this report).

CHALLENGES
Government information is incomplete for: budgets, expenditure reports, central government expenditure, state/provincial expenditure, local government expenditure. Other incomplete sources financial information includes: external support expenditure, international public transfers, voluntary transfers.
Behaviour 1:
Enhance government leadership of sector planning processes

GOVERNMENT

1.1 A regularly reviewed, government-led national plan for WASH is in place and implemented
- ✓ Urban Sanitation
- × Rural Sanitation
- ✓ Urban Drinking-water
- ✓ Rural Drinking-water
- × Hygiene Promotion
- ✓ WASH in Schools
- ✓ WASH in Health Care Facilities
- ● WASH Coverage targets are present
- ✓ Specific measures to reach vulnerable groups exist

Government reported data (GLAAS country survey 2018/2019)

GOVERNMENT

1.3a.i Activities captured in national WASH plans or aligned through mutual agreement

- Proportion of activities aligned
  - ND Ministère de l’Energie, des Mines et de l’Environnement
  - ND Ministère de la Santé
  - ND Ministère de l’Economie et des Finances
  - ND Ministère des Affaires Générales et de la gouvernance
  - ND Ministère de l’Intérieur

DEVELOPMENT PARTNERS

1.3a.ii Activities captured in national WASH plans or aligned through mutual agreement

- Proportion of activities aligned (5 largest donors)
  - ND Japan
  - ND United Arab Emirates
  - ND Germany
  - ND EU Institutions
  - ND Arab Fund (AFESD)

DEVELOPMENT PARTNERS

1.3b ODA allocated to water and sanitation policy and administration and education and training

§ Development partner data (OECD CRS-DAC)
¶ Data from Public Expenditure and Financial Accountability report (PEFA)
### Behaviour 2: Strengthen and use country systems

#### GOVERNMENT

| 2.1a | Government defined public financial management and procurement systems adhere to good practices
| 🟢 | ✓ Complete annual financial reports
| ✓ | Procurement methods
| ✓ | Public access to procurement information
| ND | Quality of budget and financial management information
| ND | Quality of public sector management and quality of institutions
| ⚫ | Supreme Audit Institution independence

#### GOVERNMENT

| 2.2a | Development partners adhere to country planning processes and policies
| ND | Percentage of ODA spending using country procurement system(s) (5 largest donors)
| ND | Japan
| ND | United Arab Emirates
| ND | Germany
| ND | EU Institutions
| ND | Arab Fund (AFESD)
| Other reporting development partners | 100% France
| ND | African Development Bank
| ND | International Bank for Reconstruction and Development
| ND | Belgium

| 2.2b | Amount of ODA allocated to strengthening country systems compared to WASH infrastructure projects
| ND | Proportion WASH ODA with participatory development and good governance (PDGG) as an objective
| 0% | Principal objective
| 5% | Significant objective
| 43% | Not an objective
| 52% | Not specified
| Proportion of water and sanitation ODA to support strengthening sector systems / capacity (5 largest donors)
| ND | Japan
| ND | United Arab Emirates
| ND | Germany
| ND | EU Institutions
| ND | Arab Fund (AFESD)
| Other reporting development partners | 100% France
| ND | African Development Bank
| ND | International Bank for Reconstruction and Development
| ND | Belgium

#### GOVERNMENT

| 2.1b | Public sector budget and expenditure reporting enables the number and cost of civil servants working at central, regional and local levels to be estimated for different sectors
| 🟢 | Degree of integration and reconciliation between personnel records and payroll data
| ✓ | Timeliness of changes to personnel records and the payroll
| ✓ | Internal controls of changes to personnel records and the payroll
| ⚫ | Existence of payroll audits to identify control weaknesses and/or ghost workers
**Behaviour 3:**

**Use one information and mutual accountability platform built around a multi-stakeholder, government-led cycle of planning, monitoring, and learning**

Donors, NGOs and civil society reporting results into country monitoring systems

- Donor, NGO, French civil society reporting results into country monitoring systems

- No data
- No data
- France

Data not available for other development partners.
**Behaviour 4: Build sustainable water and sanitation sector financing strategies that incorporate financial data from taxes, tariffs, and transfers and estimates of non-tariff household expenditure**

**GOVERNMENT AND DEVELOPMENT PARTNERS**

### 4.1 Data are available on taxes, transfers, and tariffs and their contribution to the WASH sector

- ✓ WASH budgets are available from government ministries and institutions (0 of 11 institutions)
- ✓ WASH government expenditure reports are available
- ✓ WASH expenditure data are available:
  - Central government
  - State/provincial government
  - Local government
  - WASH external support
- ✓ External support expenditure are available
- ✓ International public transfers

Revenue estimates from tariffs are available from utilities or other service providers:
- ✓ Sanitation
- ✓ Drinking water

Non-tariff HH expenditure (self-supply) are available:
- ✓ Sanitation
- ✓ Drinking water

**Spending published & shared with government (5 largest)**

- ND Japan
- ND United Arab Emirates
- ND Germany
- ND EU Institutions
- ND Arab Fund (AFESD)

**Other development partners**

100% France
ND African Development Bank
ND International Bank for Reconstruction and Development
ND Belgium

**GOVERNMENT**

### 4.2 Finance plan exists and how if operations and basic maintenance is to be covered (tariffs or household)

- ★ ★ ★ Urban sanitation
- ★ ★ ★ Rural sanitation
- ★ Urban drinking water
- ★ Rural drinking water

**DEVELOPMENT PARTNERS**

### 4.3a Data are available on whether WASH assistance is a) on treasury or b) on budget

- Donors going through national budget (disaggregated)
  - African Development Bank, EU Institutions

Proportion of total water and sanitation-related ODA
- 0% Included in the national budget
- 0% Channelled through the treasury
- 0% Off-budget

Proportion of funding as sector budget support (5 largest)

- ND Japan
- ND United Arab Emirates
- ND Germany
- 4% EU Institutions
- ND Arab Fund (AFESD)

**Other development partners**

- ND France
- 4% African Development Bank
- 0% International Bank for Reconstruction and Development
- ND Belgium

Development partners providing pooled funding
No data

Donors providing general budget support
- EU Institutions, Saudi Arabia

**GOVERNMENT AND DEVELOPMENT PARTNERS**

### 4.3b WASH financing is predictable

- Domestic absorption during last three years
  - Less than 50% Urban sanitation
  - NA Rural sanitation
  - Less than 50% Urban drinking water
  - Less than 50% Rural drinking water

- External funds absorption during last three years
  - Between 50 and 75% Urban sanitation
  - NA Rural sanitation
  - Between 50 and 75% Urban drinking water
  - Between 50 and 75% Rural drinking water

Development partners committed to multi-year funding under a multi-year investment strategy

- ✓ Germany (ND), Spain (ND)
- ● African Development Bank, CARE International, World Bank Group
- ✗ European Bank for Reconstruction and Development (EBRD)

Data not available for other development partners.
ABOUT THE PROFILES

The Sanitation and Water for All (SWA) global partnership identified four Collaborative Behaviours that, if jointly adopted by governments and development partners, would improve long-term performance and sustainability in the water, sanitation and hygiene (WASH) sector.

BASED ON PUBLIC DATA

The country profiles provide an overview of how both the government and development partners are applying the Behaviours. Information regarding the government and development partners is presented to highlight areas of success and to encourage mutual accountability. The 2020 country profiles are the second round of profiles for the Collaborative Behaviours and they may be further refined moving forward.

USING THE PROFILES

These profiles are intended as a resource for countries and development partners to review publicly available data. While the profiles are not completely exhaustive, by bringing together relevant available data they may provide an overall summary of how governments and development partners are working in the sector according to the public record and are a starting point for discussions on how to improve behaviours to strengthen long-term sector performance.

Because of limitations in the availability of relevant data, often due to incomplete reporting in the WASH sector, many of the profiles contain considerable data gaps. These gaps are presented to catalyse discussions, and trigger action to ensure these are addressed in future monitoring rounds.

DATA SOURCES

The primary country data sources include the GLAAS 2018/2019 survey and the Public Expenditure and Financial Accountability report (PEFA) and Country Policy and Institutional Assessment (CPIA). The main data sources for development partners in the country profiles are the GLAAS 2018/2019 External Support Agency (ESA) survey and OECD CRS-DAC. Up to the five largest donors according to the OECD CRS-DAC (2017) are highlighted throughout this country profile. In addition up to four development partners who have submitted responses to the GLAAS 2018/2019 ESA survey and/or OECD CRS-DAC or who have been highlighted by a government response in the GLAAS country survey are included to highlight other development partners that have published data on their activities.

1 A plan sets out targets to achieve and provides details on implementation (based on policies where these exist). It indicates how the responsible entity will respond to organizational requirements, type of training and development that will be provided, and how the budget will be allocated, etc.
2 Aggregate from the cumulative score of the sub-indicators. The level of achievement is based on the total score divided by the total possible. Eighty percent or more (>80%) is five stars; from sixty (60%) to less than eighty percent (<80%) four stars; from forty (40%) to less than sixty percent (<60%) three stars; from twenty (20%) to less than forty percent (<40%) two stars and less than twenty percent (<20%) one star.
3 Coverage targets and those missing can be found in the GLAAS 2018/2019 country survey.
4 More specifics on the vulnerable groups can be found in the GLAAS 2018/2019 country survey.
5 Development partners include civil society, nongovernmental organizations, donors and others involved in aid development.
6 The largest development partners according to OECD CRS-DAC
7 The percentage and the total amount indicated are based on the expenditure in 2017; Source: OECD CRS-DAC, 2017.
8 Development partner data (GLAAS country survey 2018/2019)
9 Development partner data (OECD CRS-DAC)
10 World Bank data from Country Policy and Institutional Assessment (CPIA)
11 Data from Public Expenditure and Financial Accountability report (PEFA)
12 Dimensions 1-3 and 6 are PEFA (Public Expenditure and Financial Accountability) scores, based on an A to D scale (https://www.pefa.org/resources/catalog). Data from the most recent assessment available were used (2016).
13 Dimensions 4 and 5 are CPIA (Country Policy and Institutional Assessment) scores based on a 1.0 to 6.0 scale.
14 Quality of budgetary and financial management assesses the extent to which there is a comprehensive and credible budget linked to policy priorities, effective financial management systems, and timely and accurate accounting and fiscal reporting, including timely and audited public accounts. (1=low to 6=high) Source: http://databank.worldbank.org/data/reports.aspx?source=country-policy-and-institutional-assessment; 2018 data.
16 Dimensions 1-4 are PEFA (Public Expenditure and Financial Accountability) scores, based on an A to D scale (https://www.pefa.org/resources/catalog). Data from the most recent assessment available were used (2016).
17 Data for this indicator are not currently collected at the global level.
18 Inequalities are assessed for “poor populations” for water, sanitation and hygiene promotion. Source: GLAS 2018/2019 country survey.
19 Data for this indicator are not country specific. Source: GLAS 2018/2019 ESA survey. Based on the question if monitoring and evaluation is a priority for the ESA WASH strategy and/or activities in the WASH sector.
